Purpose
Forestry professionals and landowners (private and industrial) in the Southeast are increasingly interested in managing forestland to enhance habitats for wildlife species. This short course aims to provide technical information on specific techniques, including forestry best management practices (BMPs), used to enhance and preserve wildlife habitat on forested land. Topics will include managing forest stands for wildlife and timber, forestry BMPs, prescribed fire as a management tool, things to consider when planting food plots and other wildlife plantings, and other principles and applications for white-tailed deer and wild turkey habitat management techniques.

Who Will Benefit?
Private and state foresters, loggers, members of forestry associations, forestry professionals (consultants and managers), forest landowners interested in wildlife management on their lands, and wildlife biologists.

Instructors
Dr. James Johnson is an Outreach Program Assistant with the University of Georgia Warnell School of Forestry and Natural Resources. James has a broad research background, from projects involving fire ecology of the Everglades ecosystem in Florida to wildlife ecology and management in the Southeast. His research while at the Warnell School focused on developing a reliable survey method of assessing white-tailed deer populations using trail cameras. James has spent most of his life on his family’s farm in North Georgia.

Registration Fee
The fee for this 8-hour course is $200.00, which includes instructional materials. The last day to register for the course is November 15, 2021.

Cancellations
In the event that you need to cancel, in order to receive a refund please contact Ingvar Elle (706-583-0566 or ingvar@uga.edu) by November 3, 2021.
Continuing Education Credits

- 8.0 Cat 1 Continuing Forestry Ed. (CFE) hours – (to be applied for)
- 2.0 Cat A; 6.0 Cat B Continuing Logger Ed. (CLE) hours – (to be applied for)

*Full Attendance is Mandatory to Receive Credit*
